Readership: 79,500

Twist (5L eaglecreek.com)

over. This rolling convertible suitcase is big enough to haul of adventure wear—hats, jackets, and even a sleeping bag—yet it's sleek enough to take on business trips and beach vacations. The standout feature that landed this wheel-to-backpack convertible at the top of our luggage test is its perfect balance of size and comfort. The other wheeled bags that integrated backpack straps were either too long to fit as a pack on most women or too small to haul loads that require the added support. The Twist's generous size wasn't overwhelming when twisted on our backs, and the Westlite mesh shoulder straps and waist belt wicked moisture and stayed comfortable even on those jiving treks up hotel steps. Note to one-piece packers: The Twist doesn't include an attached day pack, and it's too big to carry on.
